EDUCATION

M.S. Cybersecurity (Information Assurance, Cyber Operations) · Southern Utah University, 2025

B.S. in Digital Forensics · Utah Tech University, 2013

CERTIFICATIONS

Certified AI Agent Security Specialist · Proofpoint, 2026

CISSP · ISC2-618515, 2025

👤 CAREER PROFILE

Information Security executive with more than a decade of experience leading enterprise cybersecurity strategy, governance, cloud security, compliance, and risk management for high-growth SaaS organizations. Proven success building security programs from the ground up, leading SOC 2 Type II and PCI DSS compliance initiatives, directing incident response, partnering with engineering to implement secure-by-design principles, and serving as a trusted advisor to executive leadership and enterprise customers.

Most recently I've been bringing AI — generative tools, agentic workflows, and the governance that should sit underneath them — into the security program and into how the team actually ships work.

🏆 SELECTED ACHIEVEMENTS

- **Built a security program from inception** — stood up Zonos' enterprise information security program end to end (governance, policy, risk management, technical controls), carrying the API platform through SOC 2 Type II and PCI DSS.
- **Established governance & enterprise risk management** — security steering committee, risk register, security metrics, and executive reporting across the organization.
- **Directed incident response & security operations** — coordinated technical, legal, executive, and customer communications, driving post-incident improvements to organizational resilience.
- **Own customer security assurance** — lead enterprise customer security reviews, questionnaires, RFP/RFI responses, and audit support that unblock enterprise deals.
- **Set enterprise AI governance** — acceptable-use, data-handling, and vendor-risk policy for generative and agentic AI, folded into the SOC 2 evidence trail.
- **Embedded security across the SDLC** — partnered with engineering on security-by-design, infrastructure as code, and automated security testing in CI/CD.

🌐 CORE COMPETENCIES

SECURITY LEADERSHIP & GOVERNANCE: Information Security Strategy · Cybersecurity Governance · Enterprise Risk Management · Security Program Development · Executive & Board Reporting · Incident Response Leadership · Security Operations · Security Awareness & Training · Business Continuity & DR · Vendor & Third-Party Risk · Threat Intelligence

COMPLIANCE & ASSURANCE: SOC 2 Type II · PCI DSS · NIST CSF & 800-53 · CIS Controls · Risk Assessments · Security Policy Governance · Privacy & Data Protection · Customer Security Assurance

CLOUD, ARCHITECTURE & ENGINEERING: AWS & Cloud Security · Zero Trust Architecture · Security Architecture · Identity & Access Management · DevSecOps & Secure SDLC · Application Security · Vulnerability Management · Data Classification · AI Governance

🏢 EXPERIENCE

Head of Information Systems and Security

2021 — Present

Zonos · St. George, Utah

- Established and lead the enterprise information security program from inception — governance framework, policies, risk-management processes, and technical controls mapped to NIST CSF, NIST 800-53, and CIS Controls — enabling successful SOC 2 Type II and PCI DSS audits and materially raising security maturity.
- Serve as senior security advisor to executive leadership; operate the security steering committee, enterprise risk register, security metrics, and executive risk reporting.

- Own security operations and incident response and the business continuity and disaster recovery program; run vulnerability management, penetration testing, and threat intelligence.
- Lead customer security assurance — enterprise customer security reviews, security questionnaires, and RFP/RFI responses with audit support — and manage vendor and third-party risk.
- Drive security-by-design with engineering and DevOps: Zero Trust access and identity/access management, data classification, infrastructure as code in Terraform, and automated security testing across CI/CD pipelines in GitHub Actions.
- Established enterprise AI governance — acceptable-use, data-handling, and vendor-risk policy for generative and agentic AI — folded AI risk into the SOC 2 evidence trail, and standardized the team on agentic tooling (Claude Code, MCP).

Systems Engineer

2018 — 2021

SkyWest Airlines · St. George, Utah

- Operated a hybrid Azure and on-premises VMware/NetApp environment across multiple datacenters for a regional airline.
- Played a lead role in Office 365 and Azure migration, integrating SaaS, PaaS, and IaaS into enterprise workflows.
- Administered Oracle, RHEL, and CentOS Linux fleets, F5 load balancers, and Cohesity backup infrastructure.

I.T. Supervisor / Project Manager

2013 — 2018

Wilson Connectivity · St. George, Utah

- Led a team of 7 across networking, systems, support, database, DevOps, and security for a 250+ employee manufacturer.
- Drove migration to Google Workspace, Microsoft 365, and Azure while modernizing on-premises architecture.
- Ran eDiscovery, penetration testing, network analysis, and file recovery using digital forensics skills; headed security initiatives protecting company IP and customer data.

Systems Administrator

2015 — 2016

Utah Tech University · St. George, Utah

- Hardened campus systems and migrated SharePoint and Exchange workloads to the cloud.
- Collaborated with a security audit team on ongoing penetration testing to identify and remediate vulnerabilities.

SKILLS & PROFICIENCY

BUILD: Terraform · GitHub Actions · Azure DevOps · Docker / Podman · Kubernetes (k8s, k3s, Rancher) · NGINX · Apache · PowerShell · Bash · Python · Node.js · JavaScript · HTML & CSS

DEFEND: Firewalls (Palo Alto, SonicWall, pfSense) · VPN (IPSec, OpenVPN, Site-to-Site) · SSO / SAML / OIDC / ADFS · WAF · IDS / IPS / UTM · SSL/TLS & PKI · Security Monitoring & Logging · Endpoint / MDM · Penetration Testing · Digital Forensics · LLM Threat Modeling

OPERATE: AWS · Microsoft Azure · Google Cloud · Microsoft 365 · Windows Server · Linux (RHEL, Ubuntu, Kali, Arch) · VMware · NetApp · F5 Load Balancing · LAN/WAN TCP/IP

SHIP WITH AI: Claude Code · MCP Servers · Cursor · GitHub Copilot · Prompt Engineering · AI-Assisted Code Review
